FAQ

I can't run the Component services, Computer Mgmt, event viewer, Local Security Policy, task scheduler, Windows Firewall with Advanced Security, Windows PowerShell Modules from Administrative tools, because it requires MMC-Microsoft Mgmt Console, which doesn't work anymore.. Now it does not run automatically during the boot process If you use third party apps, websites or other products that are integrated with our services, they may collect information about your activity that complies with our terms and conditions of privacy.

Revun Installer is very detailed and provides insightful details about the program it tries to uninstall, including things like registry entries and where the application places files on the hard drive.. What you actually do is let UAC prompt to bypass Secure Shell and the default shell should be displayed so that malicious software can send keyboard shortcuts to the UAC query.
